REIMAGINE FERRY WHARF

boardwalk studios

PROJECT BACKGROUND

- The Tancook Island Ferry is being replaced by a new vessel that will dock in Blandford.
- It is anticipated that the existing ferry wharf will be offered by the province to the Municipality of Chester through a divestment process.
- This is a significant opportunity to enhance and plan a public space that provides public access to valuable waterfront property in the heart of the Village of Chester.

WHO IS BOARDWALK STUDIOS?

- We are a group of 6 Dalhousie Master of Planning Students.
- We're not just planners; we're good listeners, avid learners, and advocates for vibrant, thriving communities.

PROJECT OBJECTIVES

1. To consider the history and tradition of the working waterfront, and best practices for wharf re-use.
2. To understand how the public values and envisions the site.
3. To create recommendations for the future of the wharf based on community desires and local context.

PROJECT GOAL

Propose recommendations for the future of the Tancook Island Ferry Wharf and adjacent municipal parcel that enhance public access to the coast, incorporate the community's desires for the site, and reflect the history and tradition of the Village of Chester's working waterfront.
